

Introduction

— The application form —

In order to submit the application you must fill in the application form. You can let other people participate in filling in the form by granting them access. If you wish to do so, go to [e-grant -> applications](#), click on the title of your application and finally on "add participant".

— Budget and appendices —

In addition to filling in the application form two types of files must be uploaded:

- a budget file in xlsx format
- appendices in pdf format, e.g. a CV

The files must be uploaded at the sections in the application form named accordingly. The mandatory budget template can be downloaded from the section "budget".

When you upload the budget file, information from the budget will be displayed in two different manners. First, some information, e.g. the amount applied for, will be presented in the application form (at the section "budget information"). Second, the sheets termed "overview..." or "ov..." in the budget file will be incorporated in the application pdf, which will be created when you submit the application. This pdf combines the application form, the uploaded appendices and the "overview..."/"ov..." sheets from the budget into a single pdf file.

— The application form —

When you submit your application, two things will happen. First, the application will be assigned a case number and a case file will be created on e-grant ([applications->submitted](#)). Second, the application pdf, titled "Application - case number", will be created and saved in the document library on your case file. The budget (in xlsx-format) will also be saved in the document library.

As the creation of the application pdf entails merging several files into a single pdf, this process can take some time, normally no longer than 20 minutes. However, please note that the time of submission is when you press "submit" and see the confirmation page.

After the submission the application form will be locked against editing. If you wish to revise the application before the deadline, you can unlock the application at the section "administration", edit and re-submit. When you unlock, you can also replace previously uploaded files.

If you unlock, please note that only the most recent submitted application will be reviewed. If you do not re-submit an unlocked application, the previously submitted application will be reviewed.

If you wish to withdraw a submitted application, please inform e-grant support with an e-mail stating both the case number and the word "withdrawal" in the e-mail's subject.

— E-grant support —

- support.e-grant@ufm.dk
- +45 3392 9190, weekdays 9 a.m.-12 noon
- [FAQ](#), e-grant.

If you experience technical issues please send the following information to e-grant support:

1. A link to where the issue occurred
2. A screen shot
3. The time the issue occurred
4. The email address you used as login to e-grant
5. The title of your application. If you have created applications with identical titles, please provide a link to application on which the issue occurred
6. If the application has been submitted, please also provide a case number ([applications->submitted](#)).

— Invite others to help you fill in the application —

It is possible to invite case collaborators to take part in filling in the application. Invitation and assignment of rights are done by accessing the application tab. Here is how you do it:

- Click the link below (Invite collaborators)
- Find the application in the list of your applications
- Click the application title
- Click "Add new participant"
- Fill in information about the collaborator and assign rights

[Invite collaborators \(opens a new window\)](#)

— Re-opening of submitted application —

Once the application has been submitted, it will be locked against editing. However, you may re-open the application, edit, and re-submit the application until the application deadline. The application is re-opened by clicking "Administration", which you will find in the menu to the left.

Application guidelines

Innovationsfonden

Innovation Fund Denmark, Grand Solutions

Grand Solutions projects typically involve a combination of bridging academic and industrial competences as well as partners from the public sector, and must always include a clear focus on creating value for Denmark. The application form should be filled in as part of a combined effort by all the project partners.

In addition to filling in the application form a budget (xlsx) and the following appendices (as pdf) must also be uploaded:

- Appendix B - Partner motivation: Describe each partner's key competences and motivation in relation to the project activities. [Download template.](#)
- Appendix C - Key persons: Describe the key individuals in the project and include CV's for key persons. [Download template.](#)

The following additional appendices may be attached, if deemed relevant

- Appendix A: Figures, pictures, tables. Maximum five pages. [Download template.](#)

When filling in the application form it is encouraged to keep your text as short and concise as possible, avoid any redundant text and not to consider the character (with spacing and line break) limit as a target. The reviewers rarely view unnecessarily long proposals in a positive light.

For further description, please refer to the Guidelines for Grand Solutions

- [Danish version](#)
- [English version](#)

If you have questions concerning Grand Solutions projects, don't hesitate to contact Innovation Fund Denmark - find employees contact information at [Innovation Fund Denmark's website.](#)

Describe your project and methods

You can upload relevant figures or tables as Appendix A (the section attach appendices). Avoid repeating information already stated in any of the other sections.

Project description*

{max 7000 characters}

Value creation - growth and employment

FI_Ansoegning_IF_Grand_Solutions_Single_Phase_Applications_2017_UK_ValueCreation

Design

Value creation - growth and employment

- Describe the estimated and expected value creation of the project in terms of quantitative and/or qualitative measures, based on expected launch or implementation into society.
- Describe the expected value creation in the specific project in terms of quantitative and/or qualitative measures.
- State how the value will be created over time. With reference to the placement in the value creation section, which implementation, business or sales model do you expect will be relevant and optimal?

You should make it absolutely clear where your project is positioned in the value chain. Will the project terminate at a specific value inflexion point, which will be attractive for the next investor or project recipient? A value inflexion point is a plateau in the value chain, where the value has changed significantly. This could be after finishing e.g. a proof of principle study, a prototype, an animal toxicity study. The value inflexion point is often coinciding with the TRL or SRL.

An investment from Innovation Fund Denmark shall ultimately result in significant value creation in the form of growth, employment or solutions to societal challenges. Note that value creation resulting from the project and the innovation can also be more broadly described in the form of e.g. domestic or export revenue, new permanent jobs, reduced cost for society, reduced environmental or resource foot print, improved quality of life, optimised processes, etc. Please note that examples of measures or specific assessment criteria may be stated in the specific calls.

Value creation - growth and employment*

{max 2000 characters}

Intellectual property rights

FI_Ansoegning_IF_Grand_Solutions_Single_Phase_Applications_2017_UK_IntellectualPropertyRights

Design

Intellectual property rights

If relevant, describe if and how the project results should be protected. Also, intellectual property rights barriers or relations to others' intellectual properties must be described, including e.g. a brief summary of your freedom to operate analysis. Also, state if the methods chosen give rise to intellectual property problems or opportunities.

Intellectual Property rights

{max 3000 characters}

Operational work plan incl. WP and deliverables

- Provide an outline of the overall structure of the work plan.
- The project's critical paths can be explained here, including important work package dependencies.

The following definitions may be helpful:

- "Work package" means a major sub-division of the proposed project.
- "Deliverable" means a distinct output of the project, meaningful in terms of the project's overall objectives and constituted by a physical item, a prototype, software, a technical diagram, or an activity benefiting society etc. Preferably, the deliverables should have well defined acceptance criteria, defining the transfer to the next work packages or as a final outcome from the project.
- "Milestones" mean control points in the project that help to chart progress. The quantitative milestones may correspond to the completion of a key deliverable, allowing the next phase of the work to begin. They may also be needed at intermediary points so that, if problems have arisen, corrective measures can be taken. A milestone may be a critical or "go/no go" decision point in the project, where e.g. the project group and project steering committee must decide which of several technologies or solutions to adopt for the further development or eventual closure of the project.

Work plan*

Budget

FI_Ansoegning_BudgetForm_UK

Design

Please read "Budget and appendices" in the introduction.

1. Download budget template (XLSX format)

It is recommended that you use **Microsoft Excel** to fill in the budget. Please do not copy and paste information to the budget or within the budget, e.g. from one cell to another, as this can corrupt the technical integrity of the budget file, resulting in "#REF"-errors when uploading the file.

2. Upload budget (XLSX format)

3. Budget uploaded

If you wish to download the budget that has been uploaded to e-grant, please click the button to the left

Uploaded, date and time

{date and time}

Uploaded by

{uploaded by}

Support

If you encounter technical issues when uploading the budget, please send the budget (in XLSX format) to e-grant support, support.e-grant@ufm.dk with information about which spreadsheet software you are using. Preferably, also provide a screen shot of the issue. You can also contact e-grant support by telephone +45 3392 9190.

Non-Excel users

If you are using Numbers (Mac) or open source software, for instance Open Office or LibreOffice, you need to email your budget (saved as a XLSX file) to support.e-grant@ufm.dk and state which software you are using. E-grant support will then technically adapt the budget so that it can be uploaded to e-grant. The adapted budget will be e-mailed back to you.

Budget information

FI_Ansoegning_BudgetInformation_GrandSolutions

Design

The amounts and dates displayed below have been transferred from the uploaded budget (xlsx). If you wish to revise the amounts and dates you will need to upload a revised budget at the previous section.
